Life Safety and Security Services for the Financial Industry

The local knowledge and experience of our skilled professionals. Backed by the strength of a global leader in technology. When it comes to life safety and security solutions, we've got it covered.

A commitment to get it right

As a company with more than 1 million global customers, our technicians are backed by the expertise and resources of a truly global team. From a single installation at a local institution to a nationwide network of branches, we have an uncompromising commitment to getting the job done right.

Solutions you can count on

We provide comprehensive solutions for local community banks, regional institutions and credit unions, and large national banks. We analyze the requirements of each situation to deliver the best solutions designed to meet your specific needs. We're familiar with the industry's leading products, regardless of manufacturer, so we can seamlessly integrate our solutions with your legacy systems. Our cost-effective solutions also provide the flexibility to grow as your needs expand.

We're there when you need us

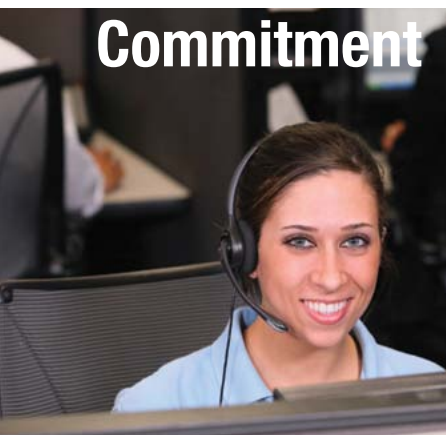

We service fire and security systems in more than 50,000 locations across the U.S., so you can rest assured we're there when you need us. We offer service across the board—from design and installation to monitoring and maintenance.

Experience

We provide solutions for thousands of banking customers. We know the financial industry and its unique protocols and application requirements.

Our technicians are among the industry's most knowledgeable professionals, with extensive factory training on products, technologies and safe practices and decades of experience in the banking industry.

Commitment

We are committed to working with our customers to deliver the highest quality products and cost-effective solutions.

One-to-One Service

One dedicated manager. One point of contact. One phone number.

Design: Comprehensive analysis of current safety and security requirements and future needs, combined with end-to-end hardware and software solutions that link with legacy systems.

Installation: On time and in compliance with code. For multiple locations. With performance measured against a single quality standard. A dedicated project manager assigned to every installation.

Service: Customized service and maintenance programs to optimize performance and lower cost over system life spans. Supported with a dedicated service manager.

Expertise and certifications to service legacy systems, not just those we install.

Ability to integrate legacy technologies of local and regional acquisitions.

Unrivaled expertise at protecting individual facilities.

To translate our expertise into real customer value, we use the ACE operating system to drive quality improvements, facilitate customer feedback, and guarantee transparency in every project.

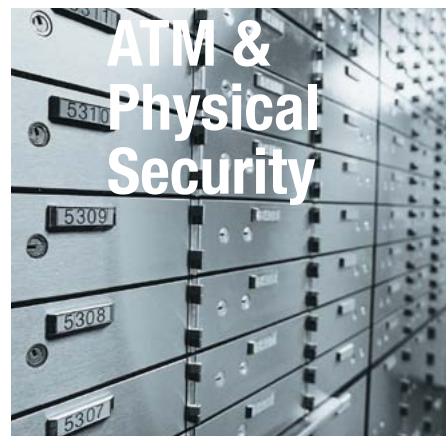

A complete portfolio of security solutions for ATMs and all other banking systems.

Resources to deliver uniform quality across multiple locations.

Test and Inspection: Periodic inspections, along with customized reports, of your life safety and security systems to ensure reliable performance and code compliance.

Monitoring: 24/7 UL-Listed Redundant Monitoring Centers in the United States and Canada. CSAA Five Diamond Certified monitoring services fully integrated in real-time with fire detection and security systems. Remote video monitoring.

Disaster Recovery: Our Disaster Recovery Program provides a fully equipped modular building—delivered to your site, enabling you to continue servicing your customers while renovating your existing facility.

ATM & Physical Security

Our physical security and ATM solutions maximize system up-time, enhance operating efficiency at individual locations, and reduce risk by providing integrated solutions for transactions, physical assets, and people—backed by 24/7 service and monitoring.

ATMs: Technology-rich hardware that reduces risk and lowers operating expenses. Leading-edge applications include anti-skimming technologies from one of the leaders in skimming prevention. Check imaging, cash acceptance, and other deposit automation functionality. Service for all ATM makes and models to help your bank stay compliant with new ADA regulations.

Safes, Vaults, Locks: UL-listed safes, vaults, vault doors, locks, depositories, teller lockers, safe-deposit boxes, and vault access control systems.

General Bank Equipment: The highest quality undercounter equipment, cash drawers, drive-up systems, and remote teller systems. Open/closed signage. Cash recyclers that enhance operational efficiencies, shorten transaction times, and improve customer satisfaction.

Sale & Lease of Modular Buildings: Full-service modular buildings specifically designed for financial institutions and customized to meet your particular needs and specifications.

Fire Safety & Electronic Security

We're part of a company that is a world leader in integrated building solutions. Our knowledge of life safety and electronic security systems, paired with the expertise of our factory-trained and NICET certified technicians, is unparalleled. We support all our systems with 24/7 service and monitoring.

Fire Detection & Alarm: From four-zone panels to large networked systems. Fire alarm and reporting panels, carbon monoxide, smoke, and heat detection. High-sensitivity and specialty application detection.

Fire Suppression: Automatic wet, dry, pre-action and deluge pipe sprinkler systems. Clean agent suppression systems, including FM-200, CO2, Halon, Novec 1230 and Argonite. Gas, foam, and water-mist suppression.

Electronic Security: Access control, intrusion alarms, and a range of surveillance systems that includes CCTV, DVR, and NVRs (analog & IP). Complete security systems integration.
